

OUT-OF-COMMUNITY-POT SEEDLINGS, READY FOR INDIVIDUAL POTS

If you have $1\frac{1}{2}$ -inch or 2-inch pots, soft brown osmunda, time and ability to pot, buy your Orchid Babies "barefoot" and watch them grow! Even if you have not been too successful with community-pot-lots of seedlings out of flasks, you should have little, if any, difficulty with these seedlings, eight to fifteen months older. Just follow instructions on Page E, in your folder.

SPECIAL: A "BAKER'S DOZEN" - TWO SEEDLINGS OF EACH OF THE FIRST SIX CROSSES LISTED - PLUS ONE SEEDLING OF THE LAST CROSS, #783. *U.S. Department of Agriculture* ALL THIRTEEN... \$5.00

(Quantities so limited, I can offer only as quoted above. No substitutions.)

#138 - C. PITTIANA (Granulosa X Dowiana, aurea) Re-make of an old cross using more vigorous parents. Unlike the first of this cross I offered, these are very sturdy and fast growing. Rose-flushed chartreuse to red-bronze clusters.

#153-B DENDROBIUM HAWAII NUI X D. PHALAENOPSIS, ALBA - Long, graceful sprays; from pink-tinted white to very dark. Autumn. (See Page U)

#159-B C. GUTTATA, LEOPOLDII X C. SCHROEDERAE - Pink-flushed delicate yellow clusters of 4 to 5-inch, heavy textured blooms with lots of gold in throats. Spring or twice yearly.

#161 - C. BICOLOR X C. AMETHYSTOGLOSSA - Red dotted russet-brown clusters are expected from this cross. Should bloom twice yearly, Spring and Fall.

#758 - LC CANHAMIANA ALBA X B. DIGBYANA - Exceedingly large, showy White or White-Colored-Lip "Brasso" type blooms for May-June season.

#765 - C. DUSABEL ALBA X LC CANHAMIANA ALBA - Grand, big, White-Colored-Lip blooms for June Weddings and Graduations.

*#783 - LC HELEN WILMER VAR VICTORY X BC HARTLAND - Extra fine dark red-lavender Blc's of fine form and substance for late Winter or twice yearly.

PLEASE NOTE: When ordering, just tear off order blank and send it and your five bucks. Keep the above list as you will need it for your record of the crosses. The seedlings fly to you in a jewell box, each seedling labelled with a little round tag, bearing number only.

* I will have more of #783 later on, but right now must limit this cross to ONE seedling per customer. Sold too many of first flasking bare root out of flask.

DANIEL RYERSON, BOX 805, HOMESTEAD, FLA.

Date _____

Enclosed is my five dollars for which please fly me the above set of thirteen "barefoot" seedlings out of community pots, each tagged with its number:

If my order reaches you later than May 15th, 1956, you may substitute another bonus seedling for #783, sending me name and description of substituted cross.

TUTTI I SOGGETTI SONO VIVERE, COME L'ALMA TUTTO-PIRELLON-SCUOLA

sono le soluzioni che sono state proposte perché finora, anche perché è un grande problema, non sono avvenuti negoziati per la "decolonizzazione" di cui, al di là delle loro dimensioni geografiche, esiste una dimensione politica e culturale. Sarebbe ad oggi, quindi, una delle scelte più difficili che si debba fare per il nostro paese.

Quando mi domandi se ho voglia di collaborare con «L'Espresso»? A volte sì, a volte no. Perché tra i due ci sono cose che mi piacciono e cose che non mi piacciono.

Cose che mi piacciono sono quelle che riguardano la storia del nostro paese, le sue radici, le sue tradizioni, le sue culture. Cose che non mi piacciono sono quelle che riguardano la politica, le sue idee, le sue teorie, le sue analisi. Cose che mi piacciono sono quelle che riguardano la cultura, le sue forme, le sue espressioni. Cose che non mi piacciono sono quelle che riguardano la politica, le sue idee, le sue teorie, le sue analisi.

Cose che mi piacciono sono quelle che riguardano la storia del nostro paese, le sue radici, le sue tradizioni, le sue culture. Cose che non mi piacciono sono quelle che riguardano la politica, le sue idee, le sue teorie, le sue analisi.

SPRING CLEAN-UP OF "BABIES" OUTGROWING FIRST "SHOES"!

My "cheaper-by-the dozen" listings of hybrid seedlings in $1\frac{1}{2}$ -inch pots have been popular. These babies had advanced beyond that most tricky community-pot stage and were all set to go on growing for another six months to a year.

But this is the first time I've given you a chance at BIG BABIES whose first shoes are pinching their toes, and for the same \$10.00 per DOZEN price, while they last! They are not only three times as big as when first offered in $1\frac{1}{2}$ -inch, they are a full year closer to blooming size. All are ready for 2-inch pots; some can go right into $2\frac{1}{2}$ -inch without being over-potted.

Once they are well established in 2-inch pots, they will be priced at \$2.50 to \$3.50 each, according to the cross. Are you a "do-it-yourself" fan? By doing the repotting yourself, you can buy for ten dollars, twelve fine seedlings that would cost you twenty-seven dollars three months from now.

Why don't I repot them and get that additional \$17.00 on each dozen? I have three good reasons: I lack the time; I lack the room the larger pots would occupy; I need the room the "BABIES" now occupy for MORE babies ready to come out of community pots.

OUT-OF-POTS, they are easier to pack, lighter to ship, so they travel by PREPAID Parcel Post, saving you the transportation charges. If you want yours by AIR MAIL, you pay the difference between Parcel Post and Air Mail.

- Ph-15 PHAL. DORIS X P. ELIZABETHAE - Top quality White "Moth Orchids."
- 82-R BLC MARION RYERSON X LC RAVENGLASS - Dark red-lav.; Winter or twice yearly.
- 93-G BLC LUCY FARFAN X C. TRIANAE, SPRING MORN - Creamy yellow to peach; col.lip.
- 162-V VANDA TERES X V. GILBERT TRIBOULET - Blue-lavender Vanda clusters.
- 544-D DEND. PHALAENOPSIS, DIXON X SELF - Dark red-purple Dendrobium sprays.
- 711 LC BRITANNIA ALBA X LC PARIZADE ALBA - Fine WLC blooms for Spring.
- 737 LC GWEN SANDER X C. TRIANAE, ED KNIGHT - Dark "lipstick" tipped petals.
- 751 C. AMETHYSTOGLOSSA X C. ENIDSON - Bright, dark, heavy pink clusters.
- 752 C. HENRIETTA JAPHET X C. AMETHYSTOGLOSSA - Delicate pink clusters.
- 759 C. MLLE. LOUISE PAUWELLS - Large "Wedding Whites"; June & Nov.
- 760 LC CYNTHIA X LC NEW YORK X C. GRANULOSA - Peach flushed yellow to bronze.
- 761 C. BICOLOR X C. GUTTATA - Green to brown heavy clusters; red lips.

NOTE: All the above are VIGOROUS growers. The Phalaenopsis and Dendrobiums should bloom in twelve to eighteen months. The bi-foliate Cattleya crosses, #751, 752, 750 and 761 should bloom in three years. The rest should bloom in four years.

ONE OF EACH, OR ASSORT THE 12 AS YOU LIKEALL TWELVE.....\$10.00

DANIEL RYERSON, BOX 805, HOMESTEAD, FLA.

DATE _____

Ship one of each, ALL TWELVE of the above out of $1\frac{1}{2}$ -inch pots ____ Or assort my dozen as follows:

Enclosed is my \$10.00 check or money order, mailed on or before May 15th, 1956.

If I request shipment by AIR, I agree to refund difference between Parcel Post and Air shipping charges. _____

E Z OSMUNDA CUTTER

SAVES TIME - SAVES ENERGY - SAVES OSMUNDA

Slices Osmunda or Hawaiian tree fern neatly, effortlessly; any desired thickness—from 4" to 5" for big pots, to 1-inch thick for "Babies" being shifted to their first "shoes"! You can also use it for the fine chopping of Community-Pot-Mix!

The pair of precision ground, high carbon steel blades are as sharp as Barbers' Shears, and do their work like a huge pair of scissors. The lower blade fastens to the potting bench, while the handle of the upper blade provides ample leverage for effortless cutting.

If you are tired of wearing out butcher knives, hatchets and your good right arm chopping osmunda, imagine being able to cut up a whole bale in about an hour without even tiring yourself!

Anyone who uses a bale a month will find the cutter soon pays for itself, not only in time saved, but in reduction of osmunda waste. No raggedy edges to require extra trimming.

And what a nifty job of potting you can do when the fiber is sliced just right! Ryerson customers keep writing: "What kind of machine does your potting? It's so neat, it *must* be a machine job!"

The only machine used here is the E Z OSMUNDA CUTTER. Our potting expert is no more a machine than you are. A man who loves plants does a better job of potting them than any machine.

No, our potter is not the man pictured above, whom many will recognize as co-owner of one of the largest Orchid ranges in Florida for wholesale production of cut flowers. He and his wife both use an E Z OSMUNDA CUTTER (yes, women operate it as easily as men) and insist: "We don't know how we ever got along without it!"

Price of E Z OSMUNDA CUTTER — \$25.00

F.O.B. Homestead, Fla.

(Your complete satisfaction guaranteed, or your money refunded.)
